-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because of improper language.

Applicant may wish to amend y deleting the first part of the first line, e.g., "An extractor manufactured with deposable...". Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. The claim is generally narrative and indefinite, e.g., "can have" does not positively recite the invention and "on the upper side on the bottom of said extractor" renders the claim ambiguous. Applicant may wish to amend by reciting for the extractor

to comprise a conical body having a top side and a bottom side, the body further defining a conical internal opening, said conical internal opening including internal slits on an upper side adjacent to said bottom (?) of the body, wherein said slits fit into external slits of a bottle top.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Rinehart (2,631,482).

Rinehart discloses all of the limitations of claim 1, as best understood, i.e., an extractor manufactured with disposable (may be disposed after use) and low cost materials (relative term), which can have an external hexagonal or circular form (Fig. 2) characterized as an extractor (11) in conical form from top to bottom with a conical internal opening that contains internal slits (13) on the upper side on the bottom (15) of said extractor (11) which fit into the external slits on a bottle top (e.g., 03:11).

***Conclusion***

8. Prior art made of record and not relied upon at this time, are considered pertinent to applicant's disclosure. Nielsen, Buettner, Lipson and Forsyth are cited to show related inventions.
